

GOS HRM and Flour Mills of Nigeria Group

Flour Mills of Nigeria Group Is a leading food and agro-allied group in Africa.

The Flour Mills of Nigeria (FMN) Group is made up of three large divisions comprising the following:

- Food Division
- Agro-allied Division
- Logistics and Supports

Each division is made up of numerous companies

With over five decades in Africa, the group has evolved into a household name in West Africa.

Yet even with the tremendous growth, FMN Group continued to maintain a strong culture that puts its employees and clients first. It's a fundamental reason for the company's achievements.

The FMN Group was shopping for an efficient HRIS application and we came across the GOS HRM, the implementation of the GOS HRM application was professionally done by GOS Software (GODP) team. I will recommend the GOS HRM application to other professionals (HR Manager of FMN, Kemi Oyedele-Aro)

FMN partnered with GOS Software for its HR ERP/Software need. GOS Software offered FMN a seamless deployment in a single system which was deployed and fully implemented across over twenty three Business Units (Companies).

In the words of the HR Director and the CIPM President (Olawale Adediran), "I Strongly Recommend GOS HRM for any company and professional who wants to automate its Human Resource Processes in a flexible and adaptable way".
